EDUCATION

Foundation University
B.Sc. Information Technology
2021 – 2025
GPA: 3.56 / 4.0

TECHNICAL SKILLS

- Mobile:**
React Native, Expo
- Frontend:**
React.js, HTML5, CSS3, MUI
- Backend:**
Node.js, Django, ASP.NET
- Database:**
Firebase, SQL Server, MySQL
- Languages:**
JavaScript, Python, Java
- Tools:**
Git, Vercel, Tableau, Figma
- Protocols:**
RESTful APIs, WebSockets

CERTIFICATIONS

OpenWeaver Python Programming
Python Data Science Fundamentals
— Udemy / Instructors Academy

ACHIEVEMENTS

1st in Batch — BSIT Excellence
3rd Place — Univ. Open House,
Final Year Project (OFF App)

LANGUAGES

English (Professional)
Urdu (Native)

PROFESSIONAL SUMMARY

Results-driven Full-Stack Developer with 1+ year of hands-on professional experience delivering scalable mobile and web applications across React Native, React.js, Node.js, Django, and ASP.NET. Skilled at integrating RESTful APIs, Firebase, and SQL/NoSQL databases to build cross-platform solutions used in production. Proven collaborator with UI/UX teams, committed to clean code, Agile workflows, and consistently measurable impact.

WORK EXPERIENCE

Mobile App Developer Aug 2025 – Present

MaxRemind Inc.

- Engineered 3+ cross-platform iOS/Android features per sprint in React Native, cutting QA cycle time by ~30% through close UI/UX collaboration and reusable component architecture.
- Integrated RESTful APIs and Firebase real-time sync across 2 production apps, maintaining 99%+ uptime and reducing data-load latency by ~40% through optimized queries.
- Led weekly code reviews for a 4-person team, resolving 15+ recurring performance issues and improving app responsiveness by ~25%.

Web Developer Mar 2025 – Aug 2025

MaxRemind Inc.

- Built and maintained 5+ enterprise dashboards in ASP.NET Web Forms, HTML5, and JavaScript, ensuring full cross-browser compatibility for 200+ daily internal users.
- Refactored 3 legacy UI modules, reducing average page load time by ~35% and resolving critical scalability bottlenecks across multi-user production workflows.

Full-Stack Developer Intern Sep 2024 – Mar 2025

MaxRemind Inc.

- Delivered 10+ full-stack features across React Native, React.js, MUI, and Node.js within the first 60 days, contributing directly to 2 live client-facing applications.
- Implemented 8 RESTful API integrations and Firebase real-time sync, cutting manual data-update overhead by ~50% in production environments.
- Achieved zero critical bugs in production across the final 3 months, completing all sprint tickets on time through 6 consecutive Agile cycles.

Data Visualization Freelancer 2022 – 2024

Fiverr

- Delivered 20+ interactive dashboards in Python (Matplotlib, Seaborn) and Tableau for 15+ clients, reducing their average report-generation time by 60%.
- Processed datasets of 10.5,000–100,000 rows into executive-ready visual reports, directly accelerating client decision-making and improving business presentations.

SELECT PROJECTS

OFF — Brand Awareness App

React Native · Firebase · Node.js

Cross-platform shopping app reaching 50+ local businesses at launch; awarded 3rd place at University Open House.

E-Commerce Website

React.js · Material UI · JavaScript

Full-featured online store with product filtering, cart, and admin panel — responsive on all screen sizes.

Ride Booking App (Frontend)

React Native · Expo · Maps API

Ride-hailing UI with live map integration, payment gateway, and driver-rider interface for a real client deployment.

Real-Time Chat App

React Native · Django · SQL Server

Scalable cross-platform chat supporting 100+ concurrent users with WebSocket-based real-time messaging and encryption.

TB Diagnosis App

Java · XML · Android SDK

Medical Android app for tuberculosis symptom assessment and patient record management, deployed for 3 healthcare clients.
